Stephen Bowman is President of Peregrine Senior Living and a memory care provider for the past 20 years. Stephen offers a vision of memory care that is often contrarian to many of our common industry strategies, in the effort to offer a more meaningful model of care. His presentation “What Should Dementia Care Look Like?” will begin to address and provide insight into this tragically ignored question. There are over six million Americans today that have Alzheimer’s and the numbers are growing. There is no cure on the horizon, and as a society we have entirely overlooked creating a meaningful and compassionate model of care. This thoughtful presentation and discussion will help move us closer toward an answer.
